

Urbaser Limited is committed to a responsible energy management programme as part of its overall Sustainable Development Strategy. The company, through the continuous commitment of its Directors, Management and staff, is determined to identify potential for increase efficiency whilst monitoring and reducing its energy consumption.

The Directors are especially committed in supporting staff in the pursuance of the following aims:

- Identifying and developing a cost effective energy efficiency measures at all its premises
- Seeking to reduce its energy and water usage when measured per employee
- Undertake energy walk rounds at each of its sites with a view to identifying waste area for improvement
- Include energy use as part of our annual Management Review process
- Set objectives and targets related to energy use on annual base
- Implementing energy efficiency through training and awareness and system that provide the ability to reduce CO₂ emissions and carbon footprint in the company's activities
- Complying with all legal and statutory requirements
- Achieving continuous improvement in energy performance

In order to achieve these aims, Urbaser Limited will endeavour to:

- Develop integrated energy metering and reporting framework
- Regularly monitor the consumption of energy and water where possible
- Increase awareness of energy efficiency amongst all employees
- Ensure that relevant employees receive training in energy awareness and efficiency improvement techniques
- Conduct site energy audits to identify opportunities for efficiency improvements
- Implement cost effective energy efficiency measures
- Ensure that energy efficiency and carbon emissions are considered in business decisions
- Ensure that energy efficiency measures and sustainable design features are incorporated into all new build and major building refurbishment projects
- Invest in cost effective, clean technology

This Policy statement is communicated to all personnel who may work with or on behalf of the Company and is available to the public via our website. Both the Energy Management Policy and Policy statement will be reviewed annually and updated as necessary.
